Darren Evans

Principal Building Energy Consultant

Contract: Full time
Start Date: Immediate
Location: Bristol but fully remote working is optional

Job Description

Darren Evans Ltd is an expert in building sustainability and energy efficiency. We support a broad range of clients across the construction sector to achieve their goals and aspirations.

Put simply, we're making a difference to today's climate challenges; working on flagship and cutting edge projects, influencing changes in standards, and educating people across the construction sector to help them achieve net-zero status buildings.

Due to the continued success & growth of the business, we are excited to announce a fantastic opportunity for a passionate and enthusiastic individual to join our team in the role of Principal building energy consultant.

We are looking for someone who thrives on helping our customers, challenging themselves to do better and wanting the construction industry to evolve. We are proud to have a customer lead culture within the organisation.

Having the right people who understand our values and culture is vital to ensure our business continues to thrive.

The Role

Ultimately reporting to our Operations Manager, this is a key position that requires a minimum of 7 years of experience. Working across multiple projects and clients, the role's primary function is to lead the direction of client's sustainable building strategies.

An expert in compliance, building standards, building construction and building physics is a prerequisite. You will lead by example and impart knowledge to our enthusiastic and passionate team of consultants & senior consultants, to help deliver for our clients and to help us achieve our business growth plans.

The role requires the individual to lead on strategy and guide clients accordingly, helping them to understand at early-stage project design, what is possible, how to achieve it, and how to execute & prioritise recommendations.

You will be expected to provide support across commercial & domestic projects. You will have the ability to consult not only at a project level, but at senior and director level, in order to introduce and influence positive behavioural change at organisational and individual levels, to help clients achieve their sustainability aspirations.

Your role extends beyond the practical and you will need to possess the skills to;

- Build deep relationships with influential stakeholders across client businesses
- Provide strategic & business advice that's valued for the primary purpose of proving value - leading to retention
- Identify opportunities to up-sell services in order to grow accounts & gain referrals
- Convert identified opportunities into projects or further retained services
- Create saleable packages that are fit for the client's needs
- Input on strategy for the direction of the Darren Evans business

You will have a pool of resources available in the form of supporting building energy and senior energy consultants, to assist, in executing day to day tasks. You will be required to offer support to less experienced team members where necessary, to help them learn, thrive and succeed.
